

GIM - Smart geo insights – ESRI GIS-Data Specialist

We are looking for

ESRI GIS Data Specialist, to further strengthen the support we provide to our customers at Merkator GeoUtility Services.

*At Merkator GeoUtility Services, we support innovative network operators. Our customers are companies managing networks in telecommunications, gas, electricity, water or wastewater. **75% of all Belgian network operators** are customers of the Merkator Group, including Proximus, Telenet, Fluxys, Fluvius, Ores, De Watergroep, Water-link and others.*

*Our consultants play a central role in the development, analysis and architecture of geographic ICT systems. We work in small to medium-sized teams consisting of Merkator colleagues, customer employees and other consultants. Our core strengths are independent and neutral advice, as well as the integration of GIS technologies such as **ESRI, open-source solutions, Safe Software and Hexagon** in design, analysis and development.*

We work closely with the customer's business analysts and managers: proposing ideas, designing new systems, developing, testing, releasing — and yes, fixing bugs as well. Plenty of variety guaranteed.

Within the Merkator Group, we actively support our team members in specializing, growing into new roles and learning new technologies.

*Merkator represents an international group of **more than 250 colleagues**, all sharing a strong passion for better networks and cartography.*

Your profile:

- You are an **ESRI GIS Data Specialist** with experience in the installation, configuration and architecture of **ArcGIS Enterprise, ArcGIS Online, ArcGIS Pro**, and more.
- You are able to translate customer needs into efficient database designs and configurations.
- You closely follow technological developments within and beyond the GIS domain.
- You have experience working in an enterprise environment and feel comfortable in it.
- You have **3 or more years of experience** as a data specialist.
- You communicate fluently in **Dutch and English** and have a good understanding of **French**.

Bonus:

- Experience in telecommunications, electricity, gas distribution and transmission, water or wastewater.
- Recent **ESRI certifications**.

What do we offer you?

- A growing and professional company within an international group.
- A people-first culture with plenty of growth opportunities.

- A hybrid work model combining home office with meetings at our offices in **Zellik, Leuven or Diegem**, or at the customer's site.
- A competitive salary package including a **company car**, public transport reimbursement, smartphone, laptop, meal vouchers, group insurance, hospitalization insurance and more.
- Team moments — rain or shine: summer BBQs, fun teambuilding activities, cycling or lunching together.
