

## GIM - Smart geo insights – ESRI GIS-developer

### We are looking for

an **ESRI GIS Developer**, to further strengthen the support we provide to our customers at **Merkator GeoUtility Services**.

*At Merkator GeoUtility Services, we support innovative network operators. Our customers are companies managing networks in telecommunications, gas, electricity, water or wastewater. **75% of all Belgian network operators** are customers of the Merkator Group, including Proximus, Telenet, Fluxys, Fluvius, Ores, De Watergroep, Water-link and others.*

*Our consultants play a central role in the development, analysis and architecture of geographic ICT systems. We work in small to medium-sized teams consisting of Merkator colleagues, customer employees and other consultants.*

*Our core strengths are independent and neutral advice, as well as the integration of GIS technologies such as **ESRI, open-source solutions, Safe Software and Hexagon** in design, analysis and development. We work closely with the customer's business analysts and managers: proposing ideas, designing new systems, developing, testing, releasing — and yes, fixing bugs. Plenty of variety guaranteed.*

*Within the Merkator Group, we actively support our team members in specializing, growing into new roles and learning new technologies. Merkator represents an international group of **more than 250 colleagues**, all sharing a strong passion for better networks and cartography.*

### Your profile:

The **ESRI ecosystem** holds no secrets for you: you have development experience with **ArcGIS Enterprise, Experience Builder, the JavaScript API, ArcGIS Pro, .NET SDKs**, and more.

You are comfortable working in teams within an **Agile/Scrum** environment.

Our consultants often work for the same customer over multiple years in order to fully understand the — often complex — context. At Merkator, you will quickly notice that we actively keep you connected and involved with the company.

We would be happy to provide you with more information about our customers and the role during an exploratory conversation.

- You are an **ESRI GIS Developer** with strong knowledge of **C# .NET, ESRI SDKs and APIs**.
- You have experience with database environments such as **Oracle and SQL Server**, and are able to perform queries and data operations.
- You keep up with technological developments within and beyond the GIS domain.
- You have experience working in an **enterprise environment** and feel comfortable in it.
- You have **3 or more years of experience** as a GIS Developer.
- You communicate fluently in **English** and have a good understanding of **Dutch and/or French**.

**Bonus:**

- Experience in telecommunications, electricity, gas distribution and transmission, water or wastewater.
- Recent **ESRI certifications**.

## What do we offer you

- A growing and professional company within an international group.
- A people-first culture with plenty of growth opportunities.
- A hybrid work model combining remote work with meetings at our offices in **Zellik, Leuven or Diegem**, or at the customer's site.
- A competitive salary package including a **company car**, public transport reimbursement, smartphone, laptop, meal vouchers, group insurance, hospitalization insurance and more.
- Team moments — rain or shine: summer BBQs, fun teambuilding activities, cycling or lunching together.
