

GIM - Smart geo insights – GIS Architect

We are looking for...

a GIS-Architect to strengthen our team that provides consulting services to our customers.

Below you will not find a standard vacancy, you will read a short story about where you will make the difference. Do you want work with us on a society in which geospatial data empower people to live better lives and make better decisions? Get in touch!

As a GIS-Architect,

I am driven by my passion for data and IT to turn multiple spatial data sources into consumable, high-quality geodata solutions for our customers. In my role as GIS Architect, this means going beyond implementation: I **conduct thorough technical analyses** to study, challenge, and propose GIS architectures that are tailored to each client's unique limitations, requirements, and environments.

My work involves **evaluating existing spatial infrastructures**, identifying bottlenecks, and recommending improvements that enhance performance, scalability, and interoperability. I use my deep expertise in GIS tools (such as Esri and QGIS), along with proficiency in data integration platforms like FME, to design robust architectures that are both innovative and technically sound.

My strong leadership skills and business acumen are essential to guide cross-functional teams and drive strategic geospatial initiatives. As I am responsible for translating complex technical concepts into actionable plans, aligning diverse stakeholders, and ensuring project delivery aligns with business goals, my role requires a proactive communicator who can inspire collaboration and foster a culture of innovation and continuous improvement. My ability to balance big-picture thinking with hands-on problem-solving will be key in orchestrating scalable, future-proof GIS solutions our customers' organization.

Building lasting relationships with my clients and assisting and advising them is something that I hold dear. I actively search for valuable feedback and dialogue in order to have a very good view of the customer's challenge and evolving needs at all times. In order to ensure that my proposed solutions are future-proof, I stay up to date about upcoming trends within the geodata field and the world of our customers. Thanks to my input, solutions, processes and collaborations are lifted to a higher level and colleagues, customers and partners are inspired to view challenges from a broader scope and an innovative approach.

What do we offer you?

At GIM we are convinced that employees make the difference. This is why we give them every opportunity to shine in a self-organizing context where we distribute clear areas of responsibility with lots of decision power. We offer you a versatile function in a dynamic and highly innovative company, excellent working conditions and real possibilities for career development. Our salary packages are market conform with excellent fringe benefits, and we give you the choice to opt for a mobility budget, fitting to your personal needs.
